

Real People Real Service— From Design to Delivery

Value added distributor teams up with industry leaders

CPN / Denelex Group is pleased to announce the signing of three new value added franchises. With these respective lines CDG continues to fill voids in our already enormous connector offering. The additions put us one step closer to being a one stop shop for all your interconnect needs. Stocking packages are in place and assembly will be achieved in our Sunrise Florida facility.

New

Product Ranges

- MIL-DTL-5015 (MS3450 thru MS3459 L,W,KS & KT)
- MS90362 & MS3506-1
- MIL-DTL-55302 (/55 thru /66, /138, /139, /190 thru /193)
- MIL-DTL-26500 (MS24264 & MS24266)
- BACC Qualified

Corsair Electrical Connectors is a manufacturing company specializing in connectors utilized by our military, commercial aircraft, and the aerospace industries. Located in their 75,000 sq. ft. facility minutes from John Wayne Airport (SNA) in Irvine, CA, all manufacturing is accomplished in-house. With state-of-the-art CNC machines centers for the manufacture of their shell components and injection molding machines for insert manufacturing, this company understands vertical integration. All engineering and tooling is accomplished on-site. CDG will be assembling the MIL-DTL-5015 series III which includes MS3450, MS3451, MS5452, MS3454, MS3456 & MS3459 with L & W finishes as well as with the KT firewalls and LS stainless steel versions.

Incon has been providing sophisticated, high reliability, interconnection systems for use by the computer, telecommunications, military, and aerospace industries since 1965. Started in Wakefield, MA as a division of Transitron, Incon moved to Reading, MA in 1975. Incon relocated to Phoenix in 1983 and became part of Gilbert Engineering. In 1987 a group of connector industry veterans acquired the company and moved it to Hudson, NH. In 1999 Incon significantly expanded its MIL-DTL-55302 product offerings with the acquisition of Texas Instruments' F-Series connector line. Incon has a proven track record of success and a facility and staff capable of providing the industries they serve with the highest level of quality products in the marketplace today.

RMS Connectors is located in Minneapolis, MN., and is a subsidiary of Cretex Corporation. Their focus is in supplying and manufacturing a wide variety of cylindrical electrical connectors made from aluminum and stainless steel for the aerospace industry and military aviation. This includes MIL-DTL-26500 (MS24264 & MS24266) and BACC qualified connectors. With over 20 years of experience, RMS knows how to deliver quality connectors to you every time.

For a combined 45 years CPN/Denelex Group has been supplying connectivity solutions to the Commercial, Military & Mil-Aero Industries. We look forward to growing with you and playing an integral part of your supply chain.
